### Natural Resource Projects & Practices ➤ Water Quality Implementation

Rock Creek is a fourth order tributary and flows into the Salmon River at mile 39.1. The watershed encompasses approximately 58,000 acres. Larger tributaries within the drainage include Graves Creek, which flows into Rock Creek at stream mile 3.8 and Johns Creek and Telcher Creek which flow together at stream mile 9.7 to form Rock Creek. Rock Creek has limited stream shade which is estimated at less than 25%. The goal is to work with landowners to amend agricultural practices and to restore riparian area functions to improve aquatic habitat, while working toward TMDL resources of concern reductions.
